SYSTEM DESCRIPTION

ML 311 is an energy meter designed for heating, cooling or combined heating/cooling carried by a thermal fluid; typically the thermal fluid is water, though a special features allow to calculate the energy even for water and glycol ethylene or polypropylene at several concentration. The calculator contains all the necessary circuits for calculating energy value according to the standard EN1434; the thermal energy calculation is based on the following calculation :

$$Q = \int_{t_0}^{t_1} q_m \Delta h dt$$

Where :

- Q : amount of heat (energy) transferred or absorbed
- q_m : mass flow rate of the vector fluid /kg s⁻¹
- Δh : Δ of specific enthalpy between in-let and out-let pipe line /J kg⁻¹
- t : time /s

FLOW MEASUREMENT

The calculator can calculate the flow rate throughout two channel :

- Analogic : it acquire the 4-20mA signal from a flow meter
- or
- Factorized pulses: it calculate the flow rate throughout factorized pulses coming from the flow meter

TEMPERATURE MEASUREMENT

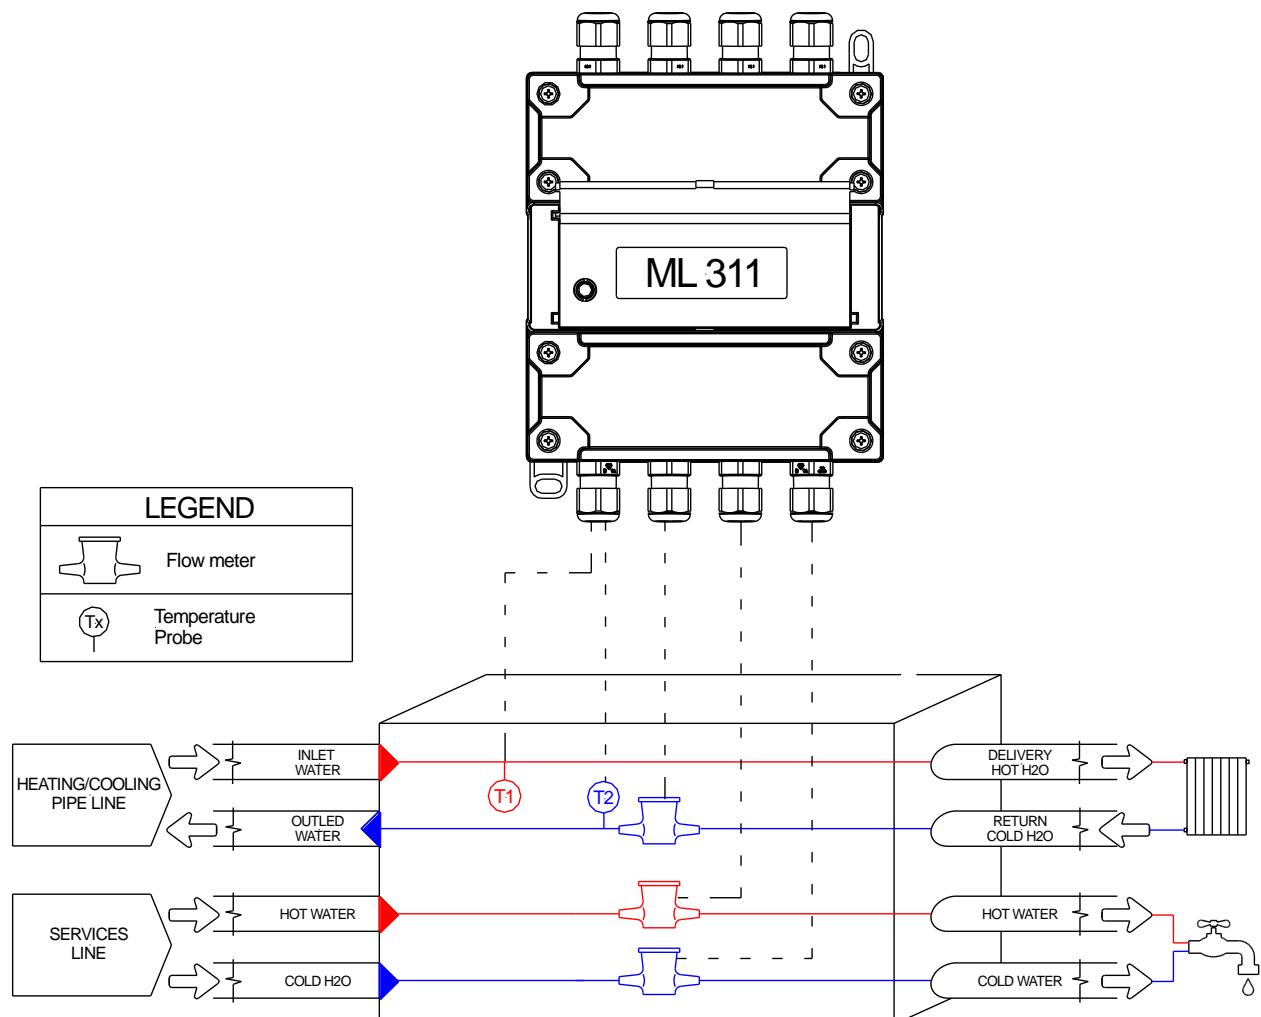

The instrument measures the temperature by RTD (PT type), in a 4-wires configuration; the PT values, can be selected via software; the allowed model are:

- PT100
- PT500
- PT1000

TIME

By a highly accurate internal reference system and an appropriate electronic switch network, the temperatures are measured by highly accurate ADC (Analog to Digital Converter).

The diagram below is a schematic of the principle: in addition to the thermal energy meter function, the ML 311 allows to totalize the hot and cold water volume used for service lines; in some cases this solution can be helpful for a quick reference of the measures and the possibility to transfer them to other systems using several fieldbus which the instrument has built-in.

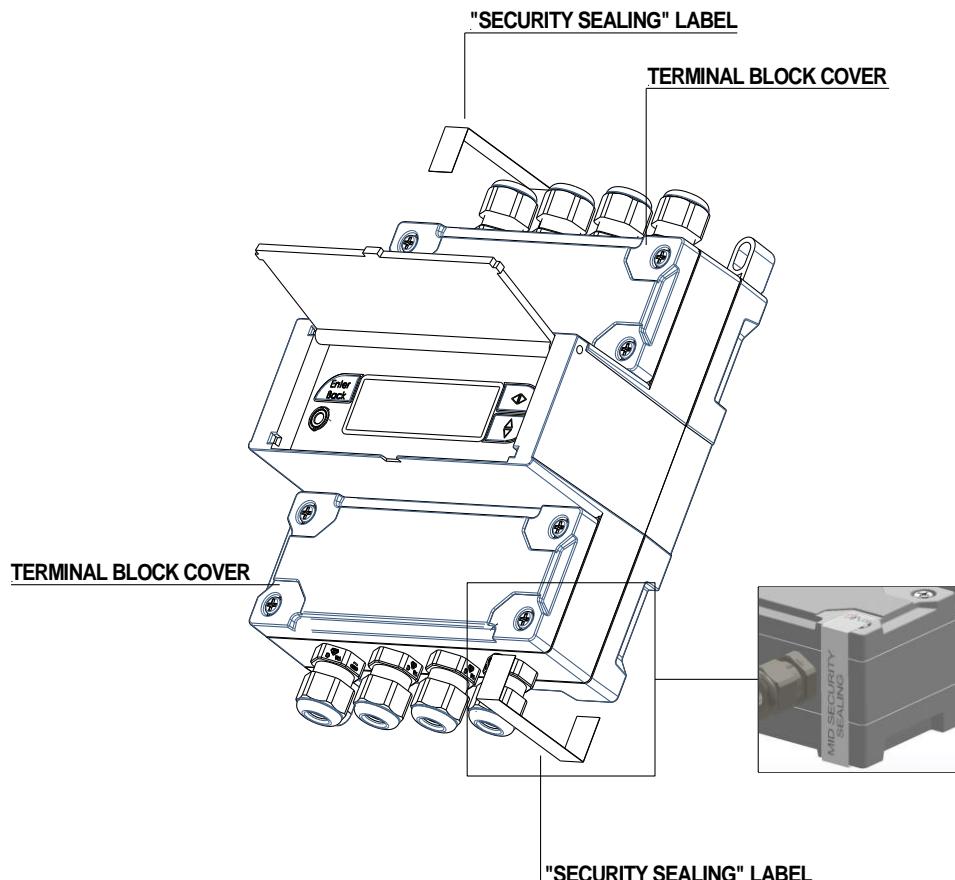

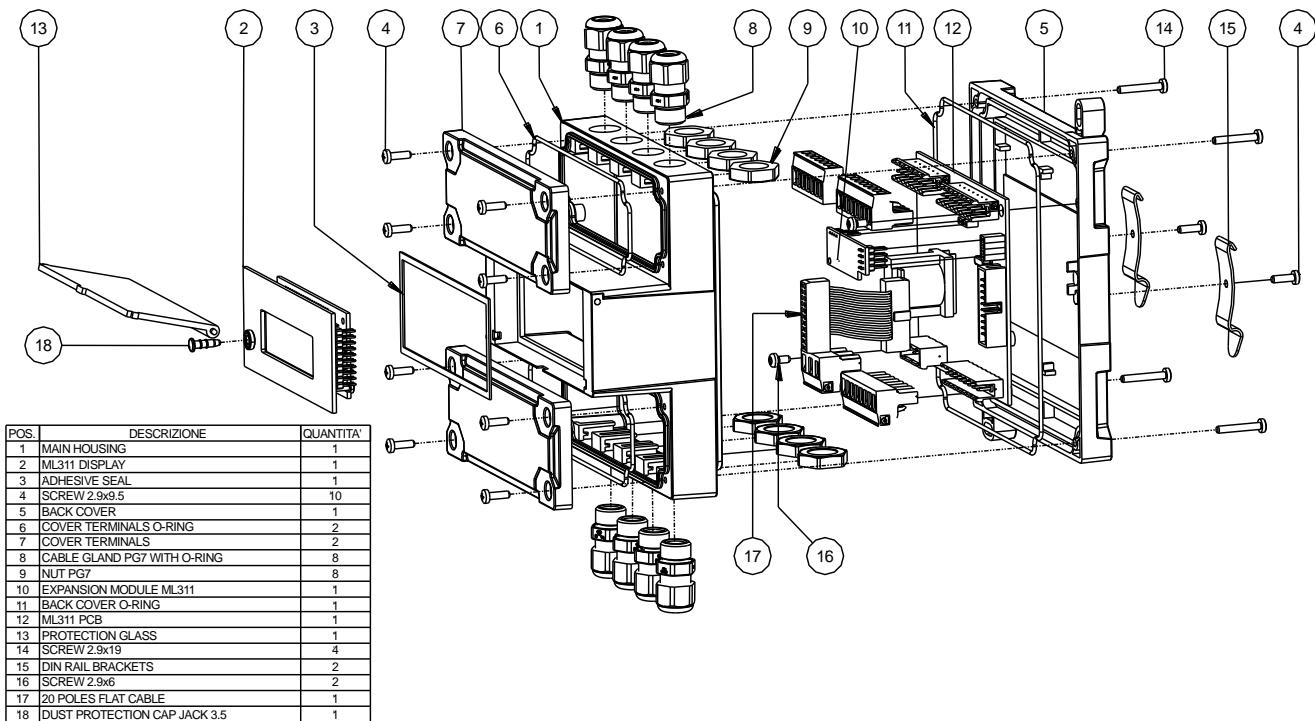

TECHNICAL DATA

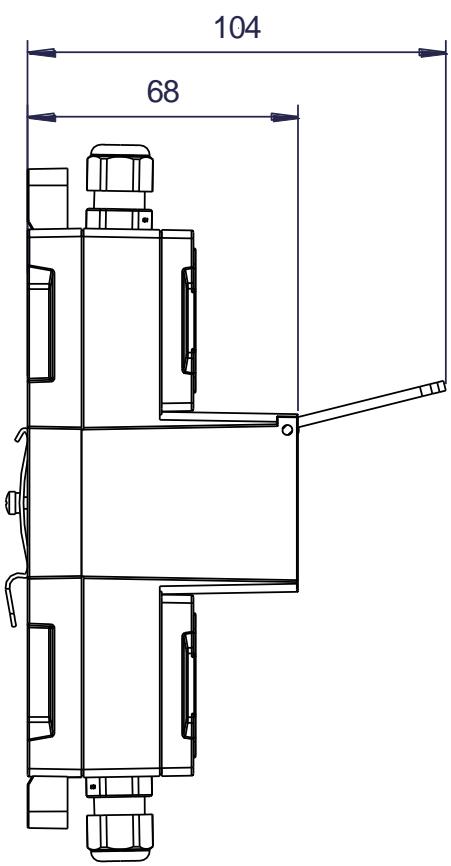

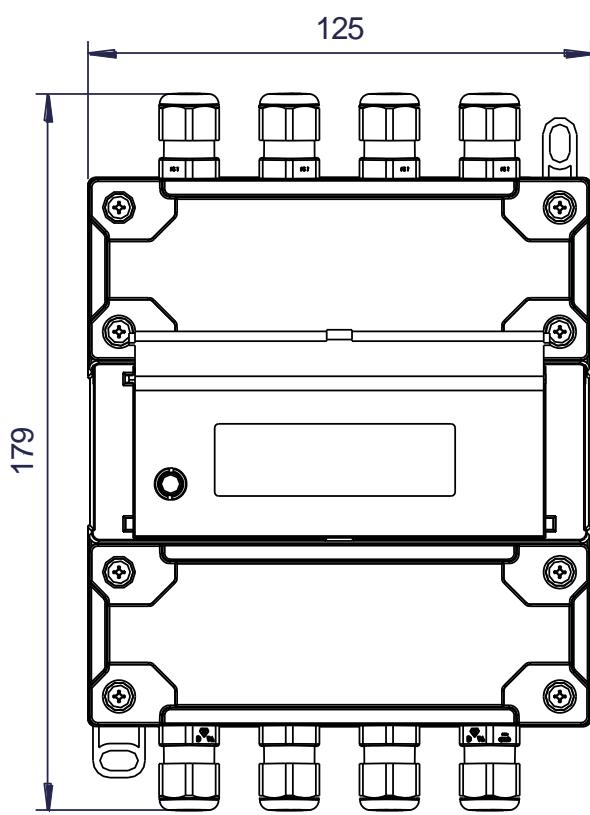

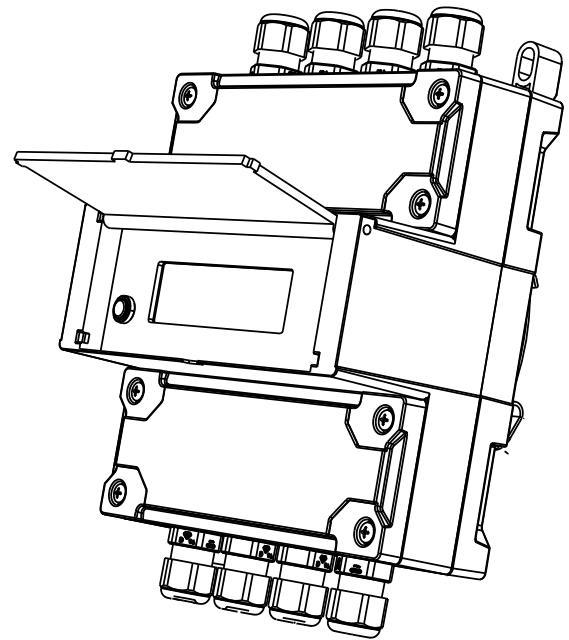

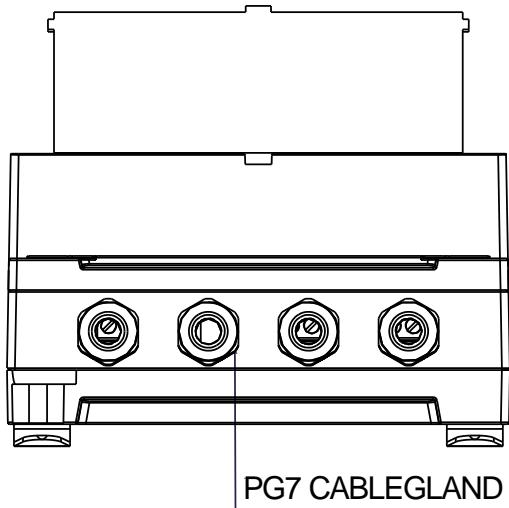

OVERALL FEATURES	
Maximum Thermal Power	<input type="checkbox"/> P_s = 99999 GW
Hot/Cold Switching	<input type="checkbox"/> Automatic through assignment of the +/- sign (possibility of congruence control from remote input)
Measure Units Available	<input type="checkbox"/> kW/MJ
Installation	<input type="checkbox"/> Any orientation - DIN rail
Altitude	<input type="checkbox"/> From -200m to 4000m (from -656 to 13120 feet)
Environmental Temperature	<input type="checkbox"/> +5... +55°C (+41...+131°F)
Temperature Range(Measure)	<input type="checkbox"/> -15... +200 (+5...+392°F) -15... +150 (+5...+302°F) for MID instrument
Protection Rate	<input type="checkbox"/> IP65

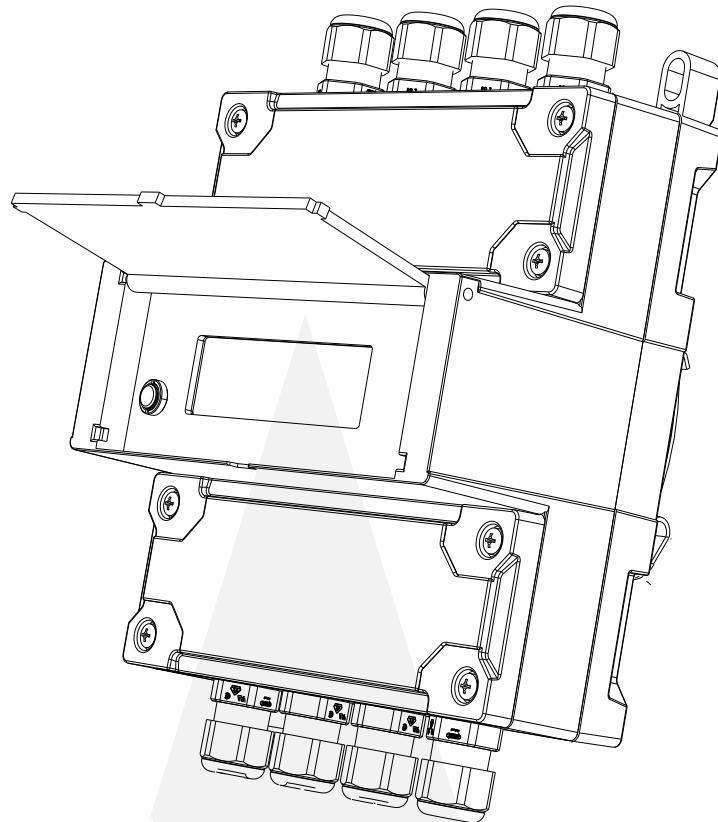

STANDARD FEATURES	
Housing Material	<input type="checkbox"/> PC/ABS self-extinguishing
Power Supply/Power Consumption	<input type="checkbox"/> 15-45V== (6W); 15-45V~ – 45-66Hz (12 VA)
Pulses Outputs	<input type="checkbox"/> N° 2 output 1250Hz, 100mA, 40Vdc
Available Protocols	<input type="checkbox"/> ETP
Digital Input	<input type="checkbox"/> N° 1 multifunction (reset totalizer, cooling /heating)
Analog Input For Flow Meter	<input type="checkbox"/> N°1 4..20mA range for measure fluid flow rate
Pulses Inputs	<input type="checkbox"/> N° 3 inputs (frequency max. 1kHz, min. 0.003 Hz): <ul style="list-style-type: none"> ▪ Vector Fluid volume ▪ Cold water volume ▪ Hot water volume
Inputs For Sensor Temperature	<input type="checkbox"/> N° 2 (one for the delivery and one for the return)
Digital Outputs	<input type="checkbox"/> N° 2 programmable for alarms or pulses for energy/volume
Programming Plug In	<input type="checkbox"/> Protected plug in for the connection to PC
Galvanic Isolation	<input type="checkbox"/> All the inputs/outputs are galvanically isolated from power supply up to 500 V
Diagnostic Function	<input type="checkbox"/> Yes
CE Certification	<input type="checkbox"/> Yes

OPTIONAL FEATURES <i>(CHECK FOR MORE DETAILS 'HOW TO ORDER' ON LAST PAGE)</i>	
LCD Display	<input type="checkbox"/> Graphic display 122 x 32 pixels back light; characters height 6,8 mm <input type="checkbox"/> 3 membrane keys
Current Output	<input type="checkbox"/> N° 1 0/4...20mA selectable alternatively for flow, energy, temperature T1, T2 or delta T
Temperature Sensor	<input type="checkbox"/> Thermal probes PT 100/PT500/PT1000 (2/3/4 wires)
Communication Port	<input type="checkbox"/> RS 485/MBus
Available Protocols	<input type="checkbox"/> Modbus over RS485/N2/BACnet over RS485/Mbus
Data Storage	<input type="checkbox"/> F-RAM: permanent data storage in power failure case
MID Certification	<input type="checkbox"/> MI-004

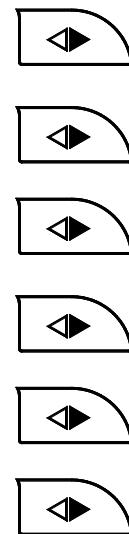

MEASUREMENT	
Temperature Measuring Range	<input type="checkbox"/> ϑ_{min} -15 °C (+5°F), ϑ_{max} 200°C (392°F)
Delta Temperature ($\Delta\vartheta$)	<input type="checkbox"/> $\Delta\vartheta_{min}$ 2 °C (35.6°F), $\Delta\vartheta_{max}$ 150 °C (392°F) <input type="checkbox"/> $\Delta\vartheta_{min}$ 0,1 °C (32.18°F) $\Delta\vartheta_{max}$ 200 °C (392°F) – for instruments without MID certificate
Measurement Accuracy	<input type="checkbox"/> System: $\pm 0.20\% (0.18 + \Delta\vartheta_{min}/\Delta\vartheta)$

ELECTRICAL CONNECTIONS

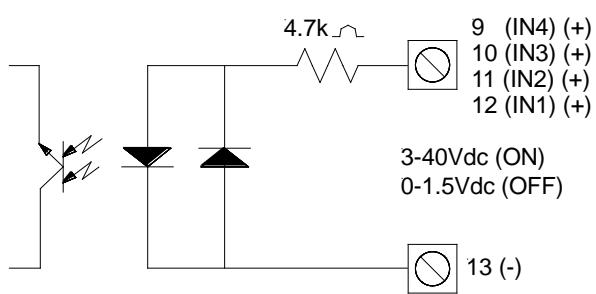

To connect 2 wire probe:
 T1: connect the probe to terminal block 2 and 3, bridge on 1-2 and 3-5
 T2: connect the probe to terminal block 6 and 7, bridge on 5-6 and 7-8

INPUTS/OUTPUTS
