# Differential Pressure Transmitter 988

## **General description**

The differential pressure transmitters of the 988 series are used to measure differential pressure and overpressure.

### **Application**

Monitoring of liquid and gaseous, non-flammable and non-aggressive media.

#### Possible areas of application

- Building automation
- Measurement technology in the sanitary and industrial sector
- Differential pressure measurement between supply and return in heating systems
- Monitoring of filters, fans and compressors
- Cooling systems for heating / air conditioning

#### **Pressure range**

For an optimal adaptation to the application, different pressure ranges are available. The measurement is carried out by a ceramic pressure measuring cell, temperature-compensated via internal PTC.

#### **Output signal**

In the 3-wire version there is an output signal of 0  $\dots$  10 V, or 4  $\dots$  20 mA available. For the 2-wire version the transmitter provides an output signal of 4  $\dots$  20 mA.

#### **Electrical connection**

The electrical connection of the transmitter is optionally available with a 4-pin standardized device plug according to DIN EN 175301 Form A, or with a 4-pin M12 flange plug, A-coded, according to DIN EN 61079.

OEM versions, assembled versions and different connection threads, as well as other measuring ranges are available on request.

## **Technical data**

Series	988			
Technology	2-wire	3-wire	3-wire	
Standard measuring ranges and pressure measuring cells (Special measuring ranges on request)	<b>0-2 bar; 0-6 bar; 0-10 bar</b> Design at pressure level PN40 Ceramic pressure measuring cell Al <sub>2</sub> O <sub>3</sub> with Parylene C coating			
Related voltage	24 VDC	24 V AC/DC (	50-60 Hz)	
Admissible operating voltage	18 – 30 VDC 18 – 30 V AC/DC			
Power consumption	< 0.51 W (VA) < 1.2 W (VA)			
Output singal (linear) Resolution 14 bit	4-20 mA	4-20 mA	0-10 V	
Output load	≤ 400 Ω @ 24 VDC	≤ 600 Ω @ 24 VDC ≤ 400 Ω @ 24 VAC	≥ 1 kΩ	
Medium, operating and storage temperature Media not freezing or with suitable frost protection!		-20 +85°C		
Char. Curve deviation (FS pressure cell)	≤ ±1.5% @ -20 +85°C	≤ ±1.0 @ -20		
Accuracy measuring cell (FS pressure cell*) *incl. non-linearity, hysteresys and reproducibility	+/- 0.4% (typ.) / +/- 1.0 (max.)			
Effect of voltage supply (FS)	< 0.04% / V			
Effect of temperature (FS pressure cell) incl. electronic	≤ 0.018% / K (typ.) ≤ 0.036% / K (max.)			
Humidity	0 -95% rH (not-condensed)			
Reference conditions technical data	EN 60770; 23°C			
Clock cycle pressure measurement Response time	< 4 ms < 2 ms 200 ms 100 ms			
Standard process connection P1 and P2	2 x inner thread G1/4 Axial			
Electrical connection	Plug connector as per DIN 175301 Form A or M12 connector DIN EN 61079 A-coded			
Materials	In contact with media: pressure chamber; Brass/ Stainless steel; EPDM O-ring; NBR seal; No contact with media: Cover ABS black; Plug connector PA black			
Weight	ca. 450 g			
Protection rating as per DIN EN 60529	IP65			
CE-Conformity according to EN 61326		<b>.</b>		
RoHS Conformity according to 2011/65/EU				

Max. permissible differential load (P1 > P2)

Measuring range	Max. load	Bursting pressure	Max. load
pressure cell	(reversible)	(irreversible)	(P1 < P2)
0 2 bar	6 bar	8 bar	1 bar
0 6 bar	20 bar	35 bar	1 bar
0 10 bar	30 bar	50 bar	1 bar

In case of a differential load more than 1 bar (P1 < P2), the pressure cell will be destroyed!

## Notes on the pressure connection

A correct function is only valid for the condition: P1 > P2.

Please note the marking P1+ and P2- on the top of the plastic cover.
